Hospitals

Carpenter Wright Engineers provided structural design services for this 206,000 square foot hospital. The six-floor full-service facility was commissioned to serve the rapidly growing population of Knox County. It is comprised of two medical office buildings, a health and fitness center, as well as cancer, imaging and women's centers. The facility also includes 10 emergency rooms and 72 patient rooms, 12 of which are in the ICU.
